

T1000n-VM

Single Tuner Freeview Terrestrial Receiver
Easy to Install - Easy to Use

DISH-TV®

- ✓ Full HD 1080p HDMI Output
- ✓ Single Tuner Digital Receiver
- ✓ Auto Channel Scan

Description

The Dish TV T1000n-VM is a Single Tuner Freeview Certified UHF Receiver. In addition to the High Definition 1080p HDMI Output, the T1000n-VM Receiver provides RCA Outputs for use in any type of installation. With a fully Automatic Channel Scan, in a few simple steps you can bring the whole range of Freeview Channels straight to your TV.

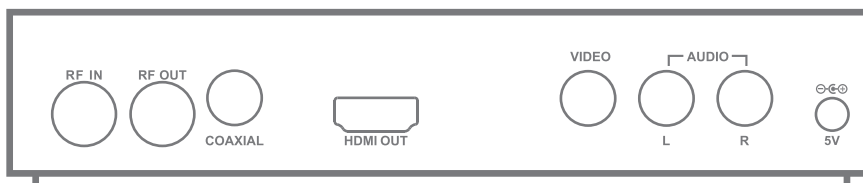

Simple Setup

It can't get any easier than this. Simply connect the T1000n-VM to your TV and your UHF Aerial setup. With a fully Automatic Channel Scan, tune in Freeview Channels at the touch of a button. Simply connect to your TV and explore what's on from the Freeview EPG.

Updates via USB Port

Due to the continual improvement of our products, software updates may be released to improve the receiver's functionality and accommodate broadcasting changes.
